

AgosiRefining

The Precious Metals Cycle

With our recycling management services, we support you in reintegrating production residues into your precious metals cycle. We process your material and provide the resulting value according to your requirements: as a delivery of fine metals or products, as a precious metal credit to your metal account, or as a purchase with payment to your bank account.

As a system supplier, we offer a comprehensive range of services along the precious metals cycle and support our customers with individually fitting solutions.

2026/09 Filing: NETZWERKMEDIEN.DE

Agosi is part of the Umicore Group, headquartered in Brussels. Umicore combines expertise in materials science, chemistry and metallurgy and operates in the business areas of Battery Materials, Catalysis, Recycling and Specialty Materials.
Together with its affiliated companies in Austria, Thailand, North America and South America, Agosi forms the Jewelry & Industrial Metals business unit within the Umicore Group. Its portfolio includes precious metal services, semi-finished products, trading products and refining services for the precious metals processing industry. Agosi is certified according to the Responsible Jewellery Council's Chain of Custody Standard (RJC CoC). In addition, the company holds the LBMA recognitions „Responsible Gold" and „Responsible Silver". Thus Agosi can offer certain precious metal products according to the respective standard requirements.

Certificates are available online www.agosi.de.
The current General Terms and Conditions apply (www.agosi.de/download).

Precious Metal Blanks for Medals and Coins
Standard and Individual Bars

AgosiPrecious Metal Blanks for Medals and Coins

Agosi – globally in use

Precious metal coin and medal blanks from Agosi AG have been in worldwide circulation for many years. Precision minting of the artist's design transforms these items into magnificent objects of value. Our clients mint them into popular collectibles in the form of medals and commemorative coins, and into coins as legal tender. Precious metal bars complete the range of this type of investment products.

Individual specifications

AgosiBlanks are made to order in silver, gold and in various precious metal alloys, in practically all sizes and surface finishes up to and including high mirror finish.

They are manufactured according to the customer's specifications and are designed to support a faithful reproduction of the pattern.

The homogeneous blanks are available either plane or rimmed, with narrow production and weight tolerances and high-quality striking and flow characteristics.

Excellent forming properties

A process quality management system controls the continuously extruded material as it passes through a series of differently sized rolling mills with high quality roller surfaces and other state-of-the-art forming machines in order to attain the specified dimensions. The result is a semi-finished product with high-qualitys forming and polishing properties. Tests can be provided if required.

Agosi – Your Partner for Precious Metals

Alloys

ALLOY	composition weight %	standard hardness ± 10 HV
fine silver	Ag ≥ 99.97	35
Ag 925	Ag 92.5; rest Cu	75
Ag 900	Ag 90.0; rest Cu	75
Ag 835	Ag 83.5; rest Cu	80
Ag 800	Ag 80.0; rest Cu	80
Ag 625	Ag 62.5; rest Cu	90
Ag 500	Ag 50.0; rest Cu	100
Ag 333	Ag 33.3; rest Cu	100
fine gold	Au ≥ 99.99	60
coloured gold 986/-	Au 98.6; rest Cu	65
coloured gold 917/53	Au 91.7; Ag 5.3; rest Cu	70
coloured gold 900/50	Au 90.0; Ag 5.0; rest Cu	100
coloured gold 750/200	Au 75.0; Ag 20.0; rest Cu	115
coloured gold 585/415	Au 58.5; Ag 41.5	80
coloured gold 333/75	Au 33.3; Ag 7.5; rest Cu	135

Further alloys on request.

Qualities

Silver

Gold

SPECIAL QUALITY
Bright rolled surface, fully annealed with uniform, fine grain structure. Each blank individually checked and vacuum packed on reusable trays. Especially suitable for mirror finish striking. For exceptionally high mirror finish requirements, polishing and ultrasonic cleaning before striking is recommended.

STANDARD QUALITY
Rolled surface with or without finishing treatment, sample checked, manufactured and packed in bulk. Blanks without finishing treatment require polishing before striking.

CURRENCY QUALITY
Surface brush finished or drum polished, rimmed, manufactured and packed in bulk.

SURFACE FINISHES
rolled
bright rolled
drum polished
brushed
pickled
fine silver blanched

RIMMED EDGE
For blanks with diameters up to 50 mm; thickness up to 6 mm

semicircular

plane

plane with a 45° angle

HARDNESS
Other than fully annealed (see table) by agreement.

Dimensions

THICKNESS
Standard range 0.3 – 4 mm, tolerance according to weight tolerance specified

DIAMETER
approx. 15 - 50 mm, tolerance ± 0.03 mm, no rim
tolerance ± 0.05 mm, rimmed
approx. 51 - 100 mm, tolerance ± 0.05 mm, no rim
(smaller tolerances on request)

WEIGHT PER BLANK
For ordering, weight per blank and diameter (stamped and/or rimmed) suffice as determining factors. The thickness is a function of these. Smaller tolerances on request.
Weight tolerance per blank ± 1.0 % (standard quality) ± 2.0 % (proof quality)
Total weight tolerance ± 0.5 % (standard quality) ± 1.0 % (proof quality)

AgosiSheets|Strips

Pre-material is the basis for brilliant results

Brush-finished or bright-rolled sheets and strips with excellent minting properties for the production of discs and medals, with suitable surface characteristics for the manufacturing of high-quality coins and investment products. It is our ambition to realize our customers' specifications in the form of products that are suited to their various applications. Whether sheet or strips – suitable high-quality material supports efficient processing further down the line.

AgosiInvestmentProducts

Customer-specified bars in fine gold or fine silver

Agosi offers individually designed investment bars with your company logo and – if required – corresponding certificates, Agosi stamp and packaging. The Agosi range comprises all the conventional sizes: gold bars 1 gr up to 400 oz and silver bars 10 grs up to 1000 oz. Customers are certainly welcome to discuss their specific ideas regarding dimensions and weights with us.

AgosiPreciousMetalsServices

Global connections

To support a reliable supply of precious metals, our Precious Metals Services team is networked with key trading centres around the world.

Our Precious Metals Services team processes purchase and sales orders with care and in a timely manner. In addition, it handles metal account transactions and the delivery of precious metals to recipients designated by you. Our range of services also includes price hedging instruments such as futures and forward contracts.

Independently audited CoC Precious Metals

Agosi holds certifications under the Responsible Jewellery Council (RJC) Chain of Custody (CoC) Standard for CoC gold, CoC silver and CoC platinum. For these materials, a risk-assessed supply and production chain can be documented from the raw material stage through to fine precious metals or semi-finished products in accordance with the requirements of the standard.

The underlying processes are regularly reviewed through independent audits and are aligned with recognised industry standards for responsible sourcing and supply chain management. In addition, Agosi complies with the requirements of the LBMA Responsible Gold Guidance and Responsible Silver Guidance.
